

Which CCTV Is Right For You?

Flexible and Modular

- We will help you choose the CCTV that is just right for you.
- The *Reliant* CCTV comes with either our advanced digital color camera or our basic black and white camera. You choose the one that's right for you.
- You may also choose if you want our new, easier to use, auto-focus camera or the original, higher powered, manual focus camera. It's up to you.
- Will you want to use the CCTV in line or side-by-side. Our separate camera and monitor design allows for in line or side by side configurations.
- We supply TV monitors and their stands from 14" to 25". What size will you need?

Reliant Auto Focus

- The *Reliant* 20" color auto-focus CCTV set up side by side is our most popular CCTV system.
- The *Reliant* auto focus option makes using your CCTV so much easier because with the state of the art auto focus camera the CCTV focuses for you.
- With the freeze frame function you could capture an image and hold it on the monitor to view at a later time.

Attractive and Ergonomic Design

- The light color and modern style will complement your home, school, or office decor.
- A low profile makes for ideal viewing.
- All the camera controls are on the front for easy access.
- The XY viewing table has a raised back edge for paper alignment and easy to grip margin and brake stop knobs.
- Wide range contrast control is ideal for picture adjustment.

Reliant 20" Color CCTV with Auto-Focus
